Bid #2024-11

**Design Build Generator Project**

**Addendum #2**

Based on existing conditions related to separate manual transfer switches for emergency electrical panels that service the housing authority and the Sr Ctr, the Town will consider options and proposals to provide a new, smaller natural gas or diesel powered generator that would automatically transfer and feed the existing emergency panels vs utilizing the existing 130KW diesel generator in the Towns possession to transfer the 2 main switchgears that serve the housing authority and Sr. Ctr.
