

A program of the Department of Aging and Disability Services, Services, Community Living Division, CT Tech Act Project

The goal of the **Access Through Technology** program is to ensure that every person with combined hearing and vision loss has access to telecommunication equipment and necessary training, granting every individual the opportunity to interact and communicate with the world around them.

This program is open to CT residents who are Deaf-Blind and meet the income eligibility guidelines. Evaluation, provision of equipment and training to effectively access telecommunication services, internet access services and advanced communications are **free**.

Examples of equipment that may be provided include:

- \* Smartphones,
- \* tablets,
- \* laptops,
- \* magnification software,
- \* amplified telephones,
- \* Braille keyboards, and more

Visit [www.cttechact.com/att](http://www.cttechact.com/att) for more information or to download our application.

**Contact us at: 860-424-5619 (voice) or 860-876-9595 (voice or text)**

Access Through Technology is a program within the CT Tech Act Project and is funded by the Federal Communications Commission (FCC) National Deaf Blind Equipment Distributions Program
